

BUILT-IN GUIDE MODULE DGX SERIES

**Invention Patent
PCT (Under Review)**

where precision matters

Akribis is a Latinized Greek word that means “Precision”. On the Akribis logo, the letter “a” is formed by a line and a circle, representing linear and rotary motions. These are supported by a tetrahedron structure, the same structure as the diamond crystal which has many exceptional physical properties.

The logo signifies that Akribis Systems’ sound engineering expertise forms the cornerstone of the company, and this enables us to provide customers with precise, direct drive motion control solutions.

Akribis Systems Pte. Ltd. was founded in 2004. We design and manufacture direct drive motors, stages and precision systems that are used in equipment for manufacturing, inspection and testing. Akribis Systems supports a wide range of industries including semiconductor, solar, flat panel, hard disk, LED, printed circuit board, printing, photonics and biomedical manufacturing.

From the beginning, the company has been focusing on innovation and development of new technologies and solutions in motion control, with more than 134 patents applied. Backed by a very strong and committed engineering team, the company continues to develop custom motors and systems for demanding applications.

We have manufacturing facilities in Singapore; Shanghai, Nantong and Dongguan (China); Selangor (Malaysia); and Siheung (Korea). Our sales network includes our sales offices in USA, Germany, South Korea, India, Thailand, Israel and Malaysia, and is reinforced by our comprehensive distribution channels in Asia, Europe and North America.

DGX Series

Introduction

- ▶ Rapid point-to-point positioning, micron-level position repeatability
- ▶ 8-row built-in guide rails, machined as a single unit with the base
- ▶ Equipped with an incremental magnetic encoder, which is economical and reliable
- ▶ Powered by iron-cored linear motors, high thrust and economical

Continuous Force $F_{cn} = 94N \sim 459N$

Peak Force $F_{pk} = 249N \sim 1213N$

Features

- ▶ Linear modules with iron core motor
- ▶ Aluminium profile base, built-in guide
- ▶ Individual runner block design, good interchangeability
- ▶ Multiple carriages optional, high efficiency
- ▶ Cost effective and fast delivery

Applications

Suitable for point to point micron level fast positioning, can satisfy 3m/s velocity.

For example: electronic semiconductors, photovoltaic and lithium batteries, glass and LCD panels, medical equipments, industrial printing machines, laser processing, precision assembly and other equipment and production lines, where high speed and high precision positioning is required for handling situations.

Dual Guide Modules Series	Linear Motor Series	Continuous Force (F_{cn})							Stroke (mm)	Repeatability (μm)	Page
		100	200	400	600	800	1000	1250			
DGX115	X3S	94		249					40-3700	± 4	05
	X3M	141		373					60-3720		05
	X3L	188		497					60-3720		05
	X3G	282		746					60-3720		05
DGX135	X5L	306		808					60-3720	± 4	10
	X5G	459		1213					60-3720		10

Note:

① For more stroke options, please consult a sales engineer

DGX115 Series

Motor Specifications	Unit	Value			
Motor	-	X3S	X3M	X3L	X3G
Continuous Force (NC) @100°C ^①	N	94	141	188	282

Mechanical Specifications	Unit	Value			
Linear Guide Nominal Size	-	Built-in Guide Rail			
Resolution	μm	Incremental Magnetic Encoder: 1.0			
		Absolute Magnetic Encoder: 1.0 (BISS-C 26bit)			
Repeatability	μm	Typical Value: ±2 / Guaranteed Value: ±4			
Straightness	μm/mm	±7 / 300			
Maximum Velocity	m/s	2	2	3	3
Rated Payload (Horizontal Orientation) ^⑤	kg	15	30	40	50
No-load Moving Mass	kg	1.8	2.7	3.6	5.2
Mounting Orientation ^⑥	-	Horizontal / Side / Inverted ^⑥			

① Measurement is taken at ambient temperature 25°C. Value depends on the thermal environment.

② Resistance is measured by DC current with standard 0.3m lead wire.

③ Inductance is measured by current frequency of 1 kHz.

④ Rated payload based on 1m/s velocity and 1G acceleration.

⑤ Please ensure that the flatness of the installation surface is within 0.02mm per 300mm. Otherwise, it may affect the accuracy and usability of the module.

⑥ It is recommended to remove the top cover when installing the module with inverted orientation.

The contents of datasheet are subject to change without prior notice.

Ordering Part Number (OPN)

DGX115-S40-X3SLT27-F6

Model:

DGX115: Built-in Guide Rail Module

Termination:

Motor: MLX 4 / Encoder: DB9

Cover Type:^①

S: Standard (Clear Anodized)

Cable Length:

F: 0.3m

Effective Stroke:^②

40: 40mm (Effective Stroke Optional Range: 40mm~3700mm)

Scale Type:

7: Magnetic Tape, 17ppm/K

Motor Type:

X3S / X3M / X3L / X3G

Encoder Type:

LT2: Incremental Magnet (1.0μm)
AMC: Absolute Magnet (1.0μm)

Note:

① Cover: Aluminum alloy (module total length ≤ 1230mm), stainless steel (Teflon black tape edging, module total length > 1230mm)

② The selection of effective module stroke is shown in the table below. For more options, please consult a sales engineer.

④ Rated payload based on 1m/s velocity and 1G acceleration.

⑤ Please ensure that the flatness of the installation surface is within 0.02mm per 300mm. Otherwise, it may affect the accuracy and usability of the module.

⑥ It is recommended to remove the top cover when installing the module with inverted orientation.

The contents of datasheet are subject to change without prior notice.

Ordering Part Number (OPN)

DGX135-S60-X5LLT27-F6

Model:

DGX135: Built-in Guide Rail Module

Termination:

Motor: MLX 4 / Encoder: DB9

Cover Type:^①

S: Standard (Clear Anodized)

Cable Length:

F: 0.3m

Effective Stroke:^②

60: 60mm (Effective Stroke Optional Range: 60mm~3720mm)

Scale Type:

7: Magnetic Tape, 17ppm/K

Motor Type:

X5L / X5G

Encoder Type:

LT2: Incremental Magnet (1.0μm)
AMC: Absolute Magnet (1.0μm)

Note:

① Cover: Aluminum alloy (module total length ≤ 1230mm), stainless steel (Teflon black tape edging, module total length > 1230mm)

② The selection of effective module stroke is shown in the table below. For more options, please consult a sales engineer.

Appendix

Multiple Carriages

DGX modules come standard with 1 carriage, The number of carriages can be increased according to requirements. module can be changed to 3 carriages or more. The number of carriages after the change is reflected in the OPN.

DGX115-2S570-X3LLT27-F6

Number of Carriages: ①

Blank: Single Carriage / 2: Dual Carriages / 3: Triple Carriages

Note:

① For more carriages, please contact a sales engineer

② Stroke of multiple carriages needs to be calculated according to the table below or contact a sales engineer

Number of Carriages Change for DGX Series

Single Carriage	-Limit Switch		Home Switch		+Limit Switch	
	Effective Stroke Y + 20		Carriage1		Base	
Dual Carriages	Home Switch1		Collision-resistant Photoelectric Sensor		Home Switch2	
	-Limit Switch		Effective Stroke Y - C + 20		+Limit Switch	
Triple Carriages	Home Switch1		Collision-resistant Photoelectric Sensor		Home Switch2	
	-Limit Switch		Effective Stroke Y - 2C + 20		+Limit Switch	

Note:

① C = Carriage Length + 20mm

② The standard module is equipped with single carriage. When equipped with multiple carriages, the number of photoelectric sensors on the base increases from 3 to 4, and the additional carriages will be equipped with 1 anti-collision photoelectric sensor

③ Module can be changed to 3 carriages or more

④ When the total length of the module is specified, increasing the number of carriages will reduce the effective stroke

⑤ If the number of carriages changes, it will come with the same number of drivers as the number of carriages
